INFORMATION FOR AUTHORS

Developmental Review, an international and interdisciplinary journal, publishes original articles that bear on conceptual issues in psychological development. Appropriate papers include (1) theoretical statements, (2) reviews of literature, (3) summaries of programmatic research, (4) empirical findings that are provocative and of particular relevance for developmental theory, (5) integrated collections of papers on a single theme, (6) analyses of social policy as it affects human development, (7) historical analyses, (8) essays on major books, and (9) analyses of method and design. Discussions and commentaries are welcomed. Subject matter may be from the disciplines of psychology, sociology, education, or pediatrics, may be basic or applied, and may be drawn from any species or age range as long as it speaks to issues of psychological development.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Developmental Review* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if the manuscript is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscripts fitting the objectives of *Developmental Review* will ordinarily be submitted to at least two reviewers for comments. Authors are invited to suggest potential reviewers with the understanding that present or former students or collaborators should not be suggested and that these recommendations are subject to the Editor's discretion. Authors wishing blind review should specifically request it and should remove identifying material from the abstract and the body of the manuscript. Persons interested in organizing a thematic collection of papers, submitting a book review, or preparing a commentary on previously published material are invited to make a preliminary inquiry to the Editor.

Manuscripts should be submitted in triplicate to: **Grover J. Whitehurst, Ph.D.,** *Developmental Review,* **Department of Psychology, State University of New York, Stony Brook, New York 11794.**

A fourth copy should be retained by the author. Manuscripts must be double-spaced throughout. Reproduced copies of the manuscript will be accepted only if they are of high quality. Each manuscript must include a concise abstract, preferably not exceeding 100 to 120 words, which will appear after the title and author's name in the published article. In most papers this abstract will obviate the need for a summary. Authors are requested to follow the specifications of the *Publication Manual of the American Psychological Association* (1974 revision) and *Guidelines for Nonsexist Language in APA Journals* in preparing their manuscripts.

Figures and Tables. Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should by typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for photographic reproduction. A convenient size for drawings is 8½ × 11 inches (21 × 27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or bristol board. Graph paper, if used, should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black. Sharp, clear glossy prints of figures are acceptable.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Literature references in the text should be cited by author's surname and the year of publication, e.g., Smith, 1960; Smith et al., 1959; Smith and Jones, 1961, p. 250 (for references to a specific page); (Smith & Jones, 1962) (ampersand for references in parentheses). If a reference has more than two authors, the citation includes the surnames of all authors at the first mention, but later citations of the same reference include only the surname of the first author and the abbreviation "et al." Suffixes a, b, etc., should be used following the date to distinguish two or more works by the same author(s) in the same year, e.g., Smith, 1960a, 1960b. Literature citations in the bibliography should be arranged alphabetically according to the surname of the author.

Journal titles should be written out in full according to the form followed in the *Psychological Abstract* (Vol. 39).

The desired style of capitalization and punctuation in references is apparent in the following examples:

Baer, D. M., & Sherman, J. A. Reinforcement control of generalized imitation in young children. *Journal of Experimental Child Psychology,* 1964, **1**, 37–49.

Cautela, J. R., & Wisocki, R. A. The use of male and female therapists in the treatment of homosexual behavior. In R. D. Rubin & C. M. Franks (Eds.), *Advances in behavior therapy*. New York: Academic Press. 1968. Pp. 165–174.

Tucker, I. *The psychology of adjustment*. New York: Academic Press, 1970.

Proofs and Reprints. Proofs will be sent to the authors with reprint order forms. Authors will be charged for alterations in excess of 10% of the cost of original composition. Fifty reprints of each article are provided free of charge. Additional reprints may be ordered on the form provided.
